

Thumb Sucker Guard

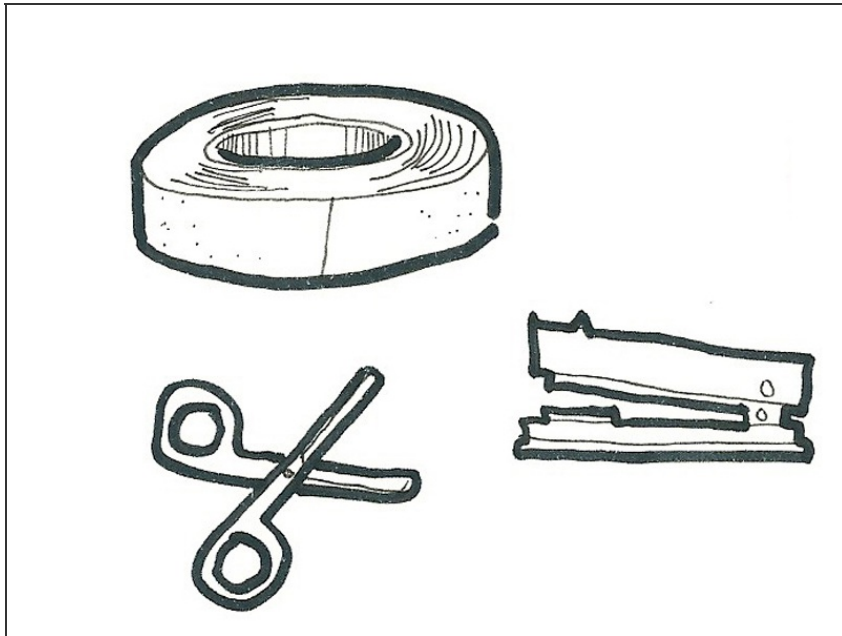

Written By: Esdras Santos

SUMMARY

You need:

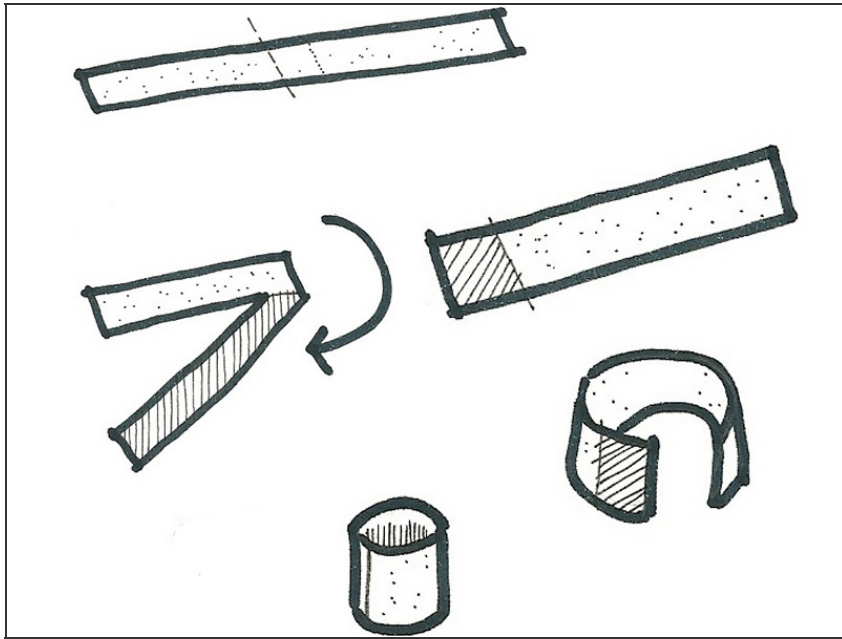

1 silver tape 1 stapler 1 scissors

Step 1 — Thumb Sucker Guard

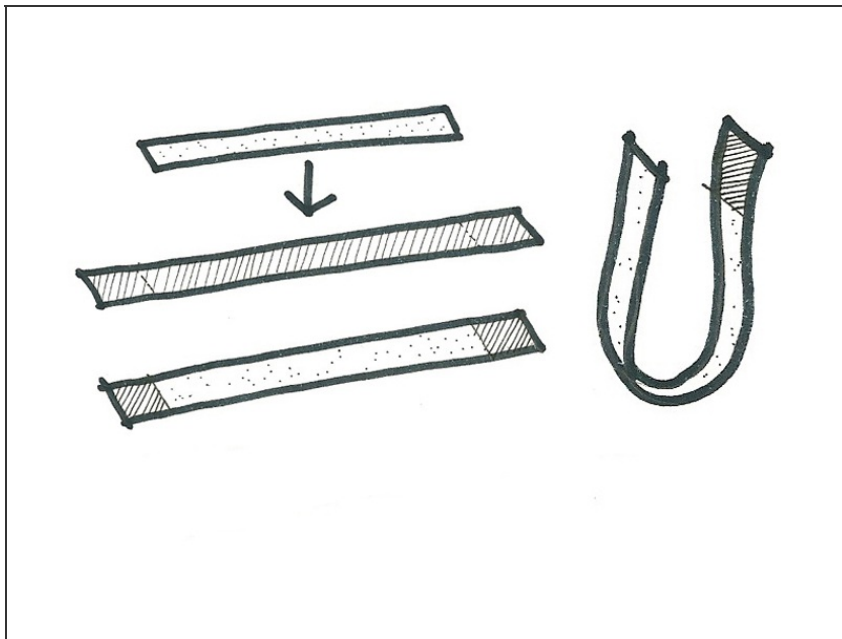

- Materials needed.

Step 2

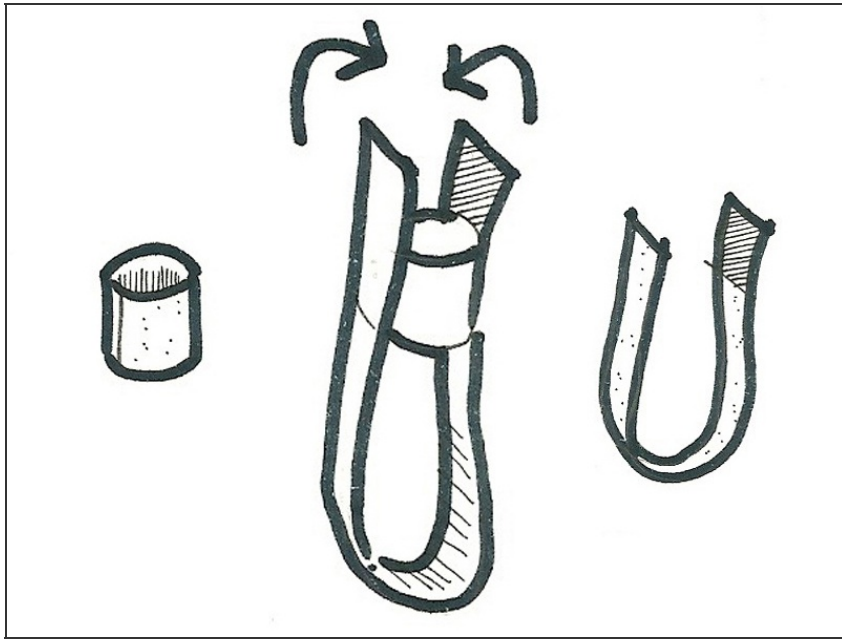

- First, cut a small piece of tape to protect the thumb.

Step 3

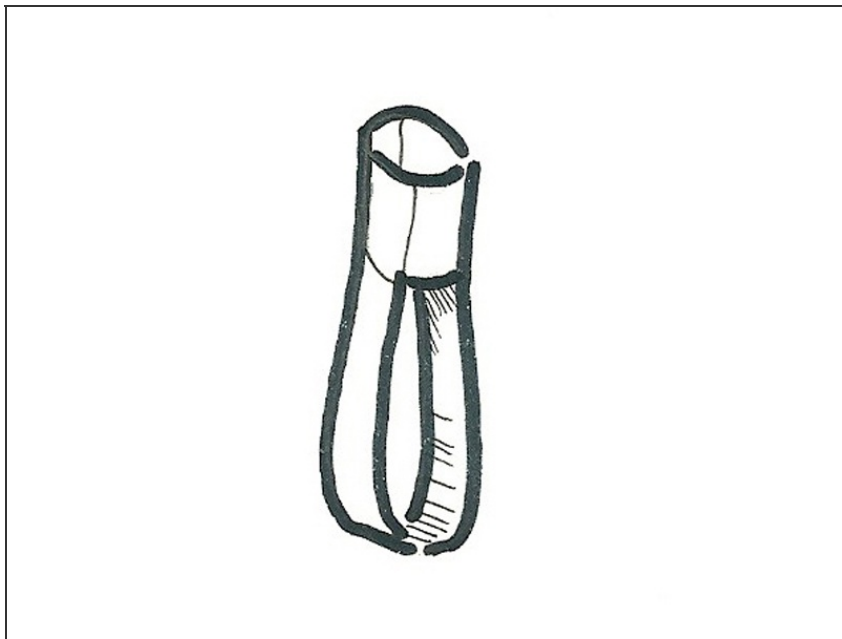

- Then cut a second piece to build the strap of the thumb protector.

Step 4

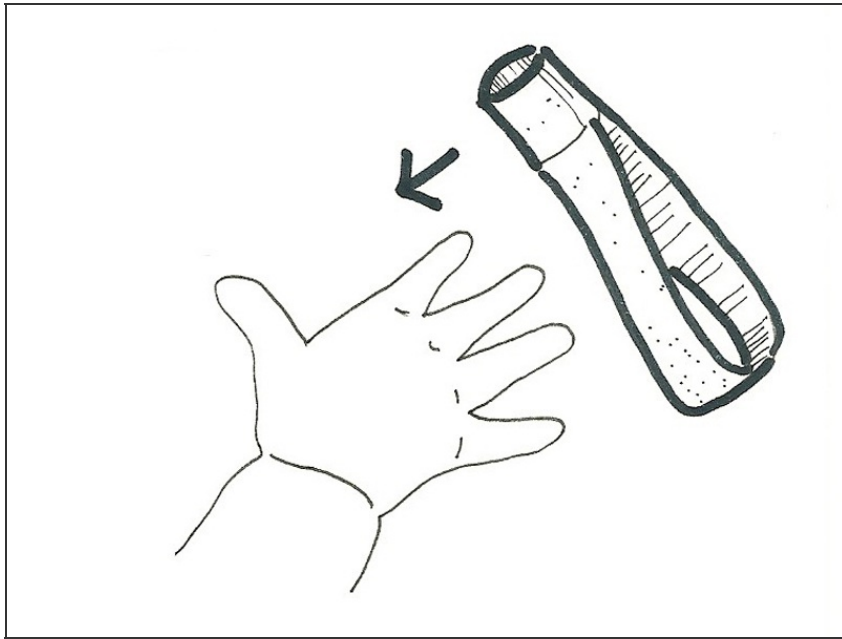

- Combine parts 1 and 2.

Step 5

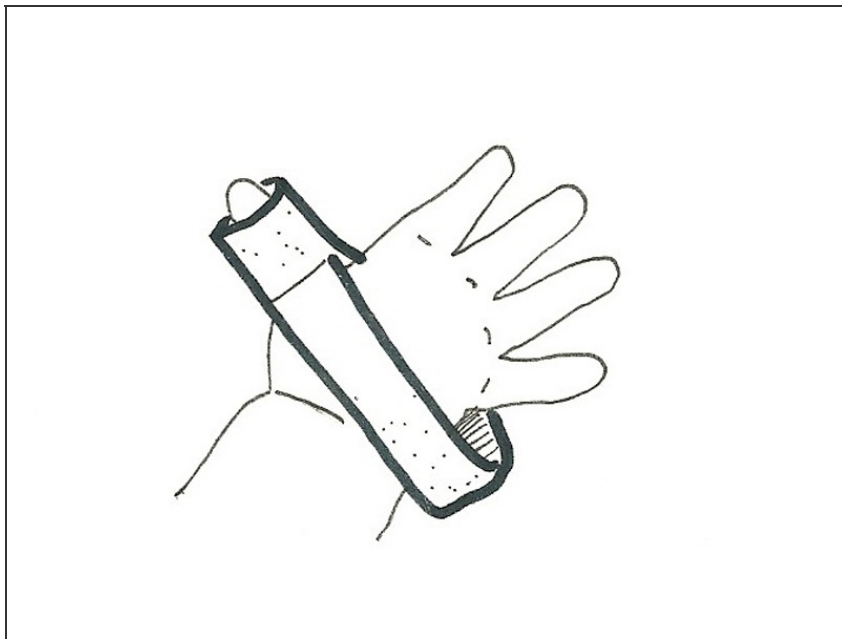

- Make sure that the parts in contact with the baby are protected with tape and that no adhesive is exposed.

Step 6

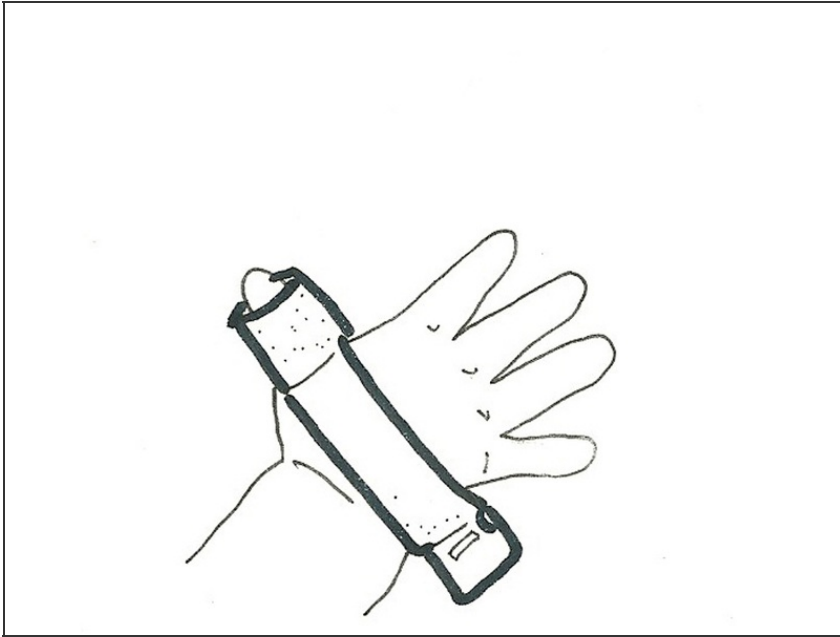

- Put the thumb protector on the baby's hand as soon as they fall asleep.

Step 7

- The thumb has to be completely enveloped by the guard.

Step 8

- Staple the tape to adjust the size of the strap to fit the baby's hand. Be careful to leave no metal protrusion that could hurt the baby!
